Dear Mr. Stoltz,

I find this very interesting that these controls were not and are not already in place. It is the responsibility of each and every member of our committees to protect and guard the assets of the committee. But that is the type of environment we live in.

I would very much agree with the FEC in the safe guards needed to protect the committee and much more so the candidate. I would back the FEC in the decision to implement the new policy and strongly encourage committees to protect themselves as well as the candidates they represent.
