

information which respondents believe are confidential, respondents may request confidential treatment of such information under 47 CFR 0.459 of the Commission's rules.

Needs and Uses: On October 9, 2020, the Commission released the 8YY (toll free) Access Charge Reform Order, FCC 20-143, that transitions intercarrier compensation for toll free services either to lower, uniform rate caps or to bill-and-keep over approximately three years as a means of curtailing abuse of the 8YY intercarrier compensation regime. The Order requires price cap and rate-of-return carriers to establish separate rate elements for certain interstate and intrastate toll free and non-toll free services. Carriers are also required to lower their 8YY database query charges over three years, and are prohibited from charging for more than one query per call. Competitive LECs assessing a tariffed intrastate or interstate Toll Free Database Query Charge must cap such charges and revise their tariffs to ensure that those charges do not exceed the rates charged by the competing incumbent LEC.

The information collected through carriers' tariffs is used by the Commission and state commissions to determine whether services offered are just and reasonable, as the Act requires. The tariffs and any supporting documentation are examined in order to determine if the services are offered in a just and reasonable manner.

Needs and Uses: Section 90.525 of the Commission's rules requires approval of license applications for Interoperability channels in the 769-775 MHz and 799-805 MHz frequency bands by state-level agency or organization responsible for administering emergency communications. Section 90.529 of the Commission's rules provides that each state license will be granted subject to the condition that the state certifies on or before each applicable benchmark date that it is providing or prepared to provide "substantial service." Section 90.531 of the Commission's rules sets forth the band plan for the 769-775 MHz and 799-805 MHz public safety bands. This section covers channel designations for base and mobile use, narrowband segments, combined channels, channel pairing, internal guard band, and broadband. Narrowband general use channels, including the former narrowband reserve channels, and low power channels require regional planning committee concurrence and narrowband air-ground channels require state or regional planning committee concurrence.

Commission staff will use the information to assign licenses for interoperability and General Use channels, as well as renewal of State licenses. The information will also be used to determine whether prospective licensees operate in compliance with the Commission's rules. Without such information, the Commission could not accommodate State interoperability or regional planning requirements or provide for the efficient use of State frequencies. This information collection includes rules to govern the operation and licensing of 700 MHz band systems to ensure that licensees continue to fulfill their statutory responsibilities in accordance with the Communications Act of 1934, as amended. Such information will continue to be used to verify that applicants are legally and technically qualified to hold licenses, and to determine compliance with Commission rules.
